

Qualitative Skills Methods

Location: Michael Tippet Room, Staff House,
University of Birmingham

Date: 20th & 21st November

Time: 09:00-17:00

Aimed at: All years

Duration: 2 days

CENTA Training Credits: 4

Training Area(s): Theme Science & Technical Skills

Increasingly, the value of combining different research disciplines and methodologies to produce more holistic studies is becoming evident: for example, many areas of research in the Environmental Sciences are recognising the need to include Social Science aspects due to the human influences and impacts of the project. Therefore, many students may wish to have a greater understanding of Qualitative Research Methods to complement the Quantitative Research Methods they may already be using.
